

I am dead against this bill. I can not believe what I am seeing here. Do local radio stations even offer 24 hour traffice and weather. No they don't. So I pay for the privilage of having it. Is this technology doing any public harm. No it is not, it is using new technology to improve life. But because local radio stations are complaining about a product they don't offer or even intend to offer, you want to outlaw it. Makes no sence to me.
